Il sistema Canyon è composto da singoli elementi, collegabili fra loro tramite incastratura manuale. L'aggancio avviene calando l'elemento superiore su quello inferiore. Il sistema di aggancio a perni consente una rotazione degli elementi da +20° a -20° rispetto l'asse mediano, consentendo adeguare il canyon alla pendenza del terreno dove viene posato.

The Canyon system is made up of individual parts which can be connected together by hand, placing the upper part over the lower one. The jointing system, carried out by means of cylindrical pins, allow the parts to rotate from +20° to -20°, thus allowing the channel system to follow the slope of the land.

Le système Canyon est composé d'éléments singuliers qui sont connectés entre eux à travers d'un ancrage manuel, en mettant l'élément supérieur sur celui inférieur. Une rotation des éléments est faisable de +20° à -20°, cela permet d'adapter la pose du système aux variations angulaires du plan de pose.

El sistema Canyon està compuesto por elementos singulares que se conectan entre ellos por medio de conexión manual, bajando la borateja superior sobre la inferior. Los pernos cilindricos permiten una rotación de los elementos desde +20° hasta -20° respecto al eje mediano, permitiendo de adaptar la instalación a las variaciones de la inclinación del terreno.

Drip line

Ala gocciolante

Drip line

Tube GR

Ala goteadora

Ala gocciolante con gocciolatore integrato, senza sporgenze, con scarsissime perdite di carico e ottima distribuzione dell'acqua.

Viene prodotta in due versioni principali:

- NC ALA NORMALE (la portata varia al variare della pressione)
- PC ALA AUTOCOMPENSANTE (la portata resta costante al variare della pressione).

Dripline with inserted drippers, without protrusions, with a very low loss factor and a very good water distribution.

The SAB® dripline is available in two models:

- NC NON COMPENSATING (flow varies according to variations in input water pressure)
- PC PRESSURE COMPENSATING (constant flow rate irrespective in input water pressure)

Tube GR avec goutteurs intégré, sans saillies, avec très réduit facteur de diminution de débit et une bonne distribution de l'eau.

Le tube GR SAB® est produit en deux modèles:

- NC TUBE GR TURBULENT (le débit varie selon la variation de la pression de l'eau)
- PC tube AUTO-REGULANT (le débit reste constant indépendamment de la variation de la pression de l'eau)

Ala goteadora con goteros integrados, lisa, con poquisimas pérdidas de carga y optima distribución del agua.

La ALA goteadora SAB® es producida en dos versiones:

- NC ALA NORMAL (el caudal varia al variar la presión)
- PC ALA AUTO-REGULADA (el caudal resta constante al variar la presión)
